

10812
Data Loggers
& RTUs

IoT Edge System

- Works as a black box for Railway Yard for signalling System
- Capture all relay status and analogue parameters in the relay room.

770
Pont Machine
Monitoring

Predictive Maintenance System

- Predicts the failures much ahead by real time analysis of point machine voltages and currents
- Improves MTTR and MTBF of system

45
Integrated
Power Supply
Monitoring

Remote Condition Monitoring

- Provides remote condition monitoring of various power supplies with in railway yard
- Identified faulty module in power distribution and informs the railway personnel

78
Battery Health
Monitoring
Unit

Predictive Maintenance System

- Predicts the failures much ahead by real time analysis of battery parameters
- Extends the battery bank life and guarantees backup

45
Block
Instruments

SIL-4 Certified

- 2o/o3 Architecture
- Complies to European CENELEC standards
- First in INDIA to develop the product and get approval

805
Safety Point
Alarm Units

Prescriptive Solution

- Eliminates accidents at railroad points through prescriptive alert to station master

200
Control
Centers

S/Ws

- Failure Analysis System
- Real-time simulation of yard
- Predictive Maintenance of railway assets
- MIS Reports
- Network Management
