PROFESSIONAL SUMMARY

Creative and detail-oriented Graphic Designer with experience in branding, print media, signboard design, brochures, social media creatives, product packaging, and advertising materials. Proficient in Adobe Creative Suite, CorelDRAW, Canva, and UI design principles. Also skilled in Front-End Development with knowledge of HTML, CSS, JavaScript, and responsive web design. Additionally, possess over 2 years of industrial experience as a Junior Engineer in mobile manufacturing, ensuring production quality, process efficiency, and team coordination. Dedicated to delivering innovative design solutions with creativity, technical expertise, and attention to detail.

EXPERIENCE

Graphic Designer | RR Traders and Manufacturing

Duration: 11 Months

Roles & Responsibilities:

Focused on the design, layout setup, and final preparation of professional signboards. Prepared vector layouts and scalable project files using CorelDraw and Adobe Creative Suite.

Graphic Designer | Efftronics

Duration: 7 Months

Roles & Responsibilities:

Designed high-quality marketing and corporate collateral, including brochures, ID cards, product stickers, flyers, posters, banners, and visiting cards. Crafted specialized visual media specifically tailored around technology themes such as Smart Signaling, Smart Buildings, IoT Solutions, and Smart Cities.

Junior Engineer (Line Leader) | BHARAT FIH LTD

Duration: 1.7 Years

Industry: Mobile Manufacturing

Roles & Responsibilities:

Served as a Production Line Leader, taking operational responsibility for meeting daily manufacturing and assembly targets.

Monitored product quality during assembly to minimize defects and ensure compliance with mobile manufacturing standards.

Allocated operational tasks to team members based on line requirements and individual skills while ensuring smooth workflow distribution.

Maintained organized tracking of materials, electronics components, and manufacturing equipment for uninterrupted production.

Graphic Designer & Frontend Developer | Vivan Projects

Duration: 6 Months

Roles & Responsibilities:

Developed and maintained clean, responsive web pages using frontend technologies and JavaScript to ensure cross-device compatibility. Translated UI/UX wireframes and mockups into functional, semantic code while prioritizing user experience. Created digital graphics, layout designs, and interface assets to support web development initiatives.
